## 911: It's Just for Emergencies

by Marsha Stewart, 911 Dispatcher

More often than not, a 911 call is NOT an emergency. So, what is a 911 emergency?

1. Any life or death situation.
2. Any injuries or medical conditions where an ambulance may be required.
3. Any crime or suspected crime that is in progress or has just occurred.
4. Traffic accidents with vehicles blocking the roadway.

If you do have an emergency the most important information a caller can give the 911 Dispatcher is your location. Know where you are at all times.

911 Dispatchers are highly trained professionals, and we are here to help. The 911 team at Euless is dedicated to public service. You can help us by taking 911 calls as seriously as we do.

## Feb. 6-12 is Burn Awareness Week

The American Burn Association created Burn Awareness Week as an opportunity to inform the public about the causes of serious burns. Burns are not limited to the effects of just fire, but can be caused by steam, hot food, chemicals and electricity.

Approximately 25,000 people suffer scald burns every year in the U.S. The National Center for Health Statistics reports that 60% of all scald injuries are suffered by young children and most of those burns are scald burns. Please protect you and your loved ones at home. It is recommended that you set the temperature of your hot water heater at or below 120°F. Exposure to water at 155°F can seriously burn a healthy adult in just one second.

Visit [www.ameriburn.org](http://www.ameriburn.org) to get injury preventing and life-saving advice. You are responsible for your safety. Learn, heed and practice burn prevention.
